Care Coordination Solutions™

Patient. Care. Trust.™

Welcome to AIS HealthCare™

Imagine a safer world for your intrathecal and infusion therapy patients... introducing AIS HealthCare, the leading provider of advanced sterile, patient-specific intrathecal pump medications and in-home intravenous infusion including immune globulin therapies. These specialty pharmacy services, combined with our advanced nursing and care coordination solutions, assist physicians and hospitals in delivering a superior level of care for optimal therapeutic outcomes.

Advanced IntrathecalCare™ Service

Our Advanced IntrathecalCare services focus on improving patient outcomes and to that end we integrate the following services:

- Specialty pharmacy dedicated to the preparation of sterile prescription medications
- Specialized in-home intrathecal nursing services
- Patient-centered care coordination

What sets AIS HealthCare's pharmacy apart is our groundbreaking sterilization program that combines traditional Aseptic Processing (AP) controls with proven Terminal Sterilization (TS) techniques. Our innovative syringe sterilization process maximizes sterility while still ensuring product potency and stability.

Each patient with an implanted pump is unique and therefore requires a customized medication, tailored to their specific needs. Providing patient-specific, intrathecal pain pump medications is one of AIS's core competencies.

All medications are prepared and dispensed from the AIS HealthCare 503A specialty pharmacy. Our experienced and licensed pharmacy team prepares sterile intrathecal medications from non-sterile powders in accordance with physician-ordered prescriptions, and in compliance with the required guidelines outlined by USP <797>, the U.S. Food and Drug Administration (FDA) and all state boards of pharmacy.

The AIS specialty pharmacy is supported with additional Advanced IntrathecalCare services including in-home pain pump refill and proactive patient care coordination.

Advanced InfusionCare™ Service

Physicians choose AIS HealthCare for their patients' infusion needs. Advanced InfusionCare is a licensed resource for home infusion solutions which provide a convenient and effective alternative to inpatient care, offering patients treatment in the comfort of their home.

AIS's highly-experienced clinical pharmacists compound complex prescription infusion therapies and support therapeutic management of:

- Complex IV and Sub Q Immunoglobulin
- Anti-Infective
- Pain Management
- Parenteral and Enteral Nutrition
- Biologic and Immunologic

Our infusion and clinical services offer 24/7 access to our pharmacists, infusion nurses and support staff delivering:

- Admixture and Compounding
- Pharmacological Management
- Hospital Coordination
- IV Therapy Management
- Medical Equipment and Ancillary Medical Supplies
- Family/Patient Training and Education

Advanced Nursing Solutions™ Service

AIS HealthCare assists patients requiring intrathecal pump and infused home therapies with Advanced Nursing Solutions. Our caring and compassionate registered and advanced practice nurses are specifically trained in both intrathecal and intravenous infusion care and receive continuing clinical and skill-based training to promote nursing excellence.

AIS intrathecal in-home care services offer providers and their patients:

- Nurses providing intrathecal pump management including patient assessments, medication refill, changes and adjustments
- Patient-centric care coordination with the full healthcare team
- Outcome-based care focused on the patient and prescriber plan of care

AIS home infusion care services include access to:

- Specialty nurses trained in the provision of complex infusion therapies
- Alternate outpatient treatment through dedicated infusion clinics (in some locations only)

Advanced Care Coordination Solutions™ Service

Patients with complex, chronic conditions fall into a high-risk group. Our Advanced Care Coordination Solutions' services provide the management of services and education as well as collaborative patient care between patients, their families and caregivers and the healthcare team.

These services accomplish optimal healthcare outcomes by providing:

- The sharing of clinical information among the patient's interdisciplinary healthcare team
- Proactive patient interventions to increase patient engagement and positive health results
- Management of care transitions and long-term condition support
- Nursing, pharmacy and reimbursement services for patients and physicians

The integration of our care coordination solutions' services promote proactive patient self-management and optimal levels of wellness.
